

Jiri Michal

I am a 33-year-old wildlife and nature photographer based in Pilsen in the Czech Republic. I started taking pictures in 2005 when I bought my first digital SLR camera.

I love nature as a whole. It gives me ideas

throughout the year: from the smallest insects to the larger birds and mammals, and also landscapes. I really like photographing in the Czech Republic, and I also travel abroad to photograph nature every year. So far I have visited Norway, Italy, Germany, Greece and France.

My photography has been published in magazines and newspapers and I lead photography workshops for both individuals and groups.
